Profile

I am a Software Engineer working in Full stack domain for 6 years. I have been developing Full stack Apps in Node.js/React using MySQL and MongoDB databases and Mobile Apps using Flutter.

Experience History

Full Stack Engineer at Upwork

APRIL 2023 — TILL NOW

I am working as Full Stack Developer at Upwork. I have worked on 3 SaaS products till now. You can check out my Upwork profile at,

<https://upwork.com/freelancers/~014af44d04ea4c395c>

Full Stack Engineer at Ping (Telebu Communications)

OCTOBER 2022 — MARCH 2023

I worked as Full Stack Developer at Telebu Communication. I was working in the ping app web development team. Ping app is the text-based team communication product of Telebu. You can check that out at,

<https://ping.telebu.com>

Full Stack Engineer at Design Confection Ethiques (FalconConsulting)

JANUARY 2022 — SEPTEMBER 2022

I worked as Project Lead at Falcon for DCE. It's a French marketplace for tailors and clients. I was responsible for both front-end in React and Node.js/Express for backend.

Front End Engineer at SchoolElite (NexGen Ventures)

FEBRUARY 2021 — JULY 2021

I worked on the schoolelite project as mobile app lead. The app was made in flutter. Here is the link to checkout the project,

<https://play.google.com/store/apps/details?id=com.myschoolelite.demo>

Full Stack Engineer at Eat a Deal (Musa Usman Co),

SEPTEMBER 2020 — JANUARY 2021

I worked as full-stack developer at EatADeal app. The app was developed in flutter and backend was written in Node.js with MySQL as database. Here is the link to checkout this project,

<https://play.google.com/store/apps/details?id=com.eatsadeal.app>

Project Lead at Athena,

JANUARY 2019 — AUGUST 2020

Athena was a startup I had developed. This project featured developing an AI model to classify an EMG signal to hand gestures which will then be fed to a prosthetic arm. The models were written and trained in python using tensorflow, numpy and scikit libraries.

Front End Engineer at Al-Nisa,

JANUARY 2018 — DECEMBER 2018

I worked as front-end developer at Al-Nisa Shop. Al-Nisa was a lady's cosmetics shop located in my hometown and was run by my family. I was responsible for

managing the shop's website which was developed in HTML, CSS and JS.

Education

B.Sc Mechatronics and Control Engineering, University of Engineering and Technology Lahore

OCTOBER 2016 — AUGUST 2020

I did B.Sc. Mechatronics and Control Engineering from there. I passed out with a CGPA of 2.771
